	<p>This report makes reference to the following documents:</p> <p>D1: EP-A-1 148 035 (HERAEUS QUARZGLAS GMBH & CO. KG) 24 October 2001 (2001-10-24)</p> <p>D2: WO 01/46079 A (HERAEUS QUARZGLAS GMBH & CO. KG; SHIN-ETSU QUARTZ PRODUCTS CO., LTD) 28 June 2001 (2001-06-28)</p> <p>Neither D1 nor D2 anticipate a method of producing a blank for a component made of laser-active quartz glass. Thus these documents also do not suggest transparent blanks that have been produced by means of a method of this type, i.e. granulate-powder route. The method known from D1 and D2 of producing non-optical opaque glass has now been successfully used for the production of doped transparent laserable glass and provides a more cost-effective way of producing said glass while ensuring homogeneous doped substance distribution and transparency. Moreover, nothing can be found in these documents to suggest gas pressure sintering. This prior art is therefore hardly suitable for putting inventive step into question.</p>
